Update to mail list application

2017-06-08 - Burner EOAS - Comments (0) - General

An update has been made to the mailing list application in the my.eos.ubc.ca portal:

- Distribution and mailing list members can be viewed.
- Updates can be made directly to the mailing lists and submitted to the help desk.
- Comment support has been (re)added.

There are still some outstanding features to be added:

- Automated distribution lists should not be editable.
- Updates to the lists should go directly to the mailing list system.
