## Configuring NTP on Windows Server 2012 R2

David Jones - 2016-11-03 - 0 Comments - in Windows

Run using PowerShell as admin:

```
w32tm /config /manualpeerlist:pool.ntp.org /syncfromflags:MANUAL
```

```
Stop-Service w32time
```

```
Start-Service w32time
```

then check if is working

```
w32tm /query /status
```
