## How to connect a Linux computer to TeamShare

Tom Yerex - 2018-05-07 - 0 Comments - in Linux

UBC's TeamShare Storage Service allows Faculty and Staff to securely store and share files with colleagues internal to UBC.

The data in your TeamShare is secured using EAD groups; only members of the designated EAD group or groups can access the data in TeamShare.

Information on how to connect to TeamShare can be found at

<https://it.ubc.ca/services/web-servers-storage/teamshare-storage-service/setup-documents>.
