How to find the MAC address for your Apple Mac computer using System Preferences

Burner EOAS - 2025-03-17 - Mac OSX

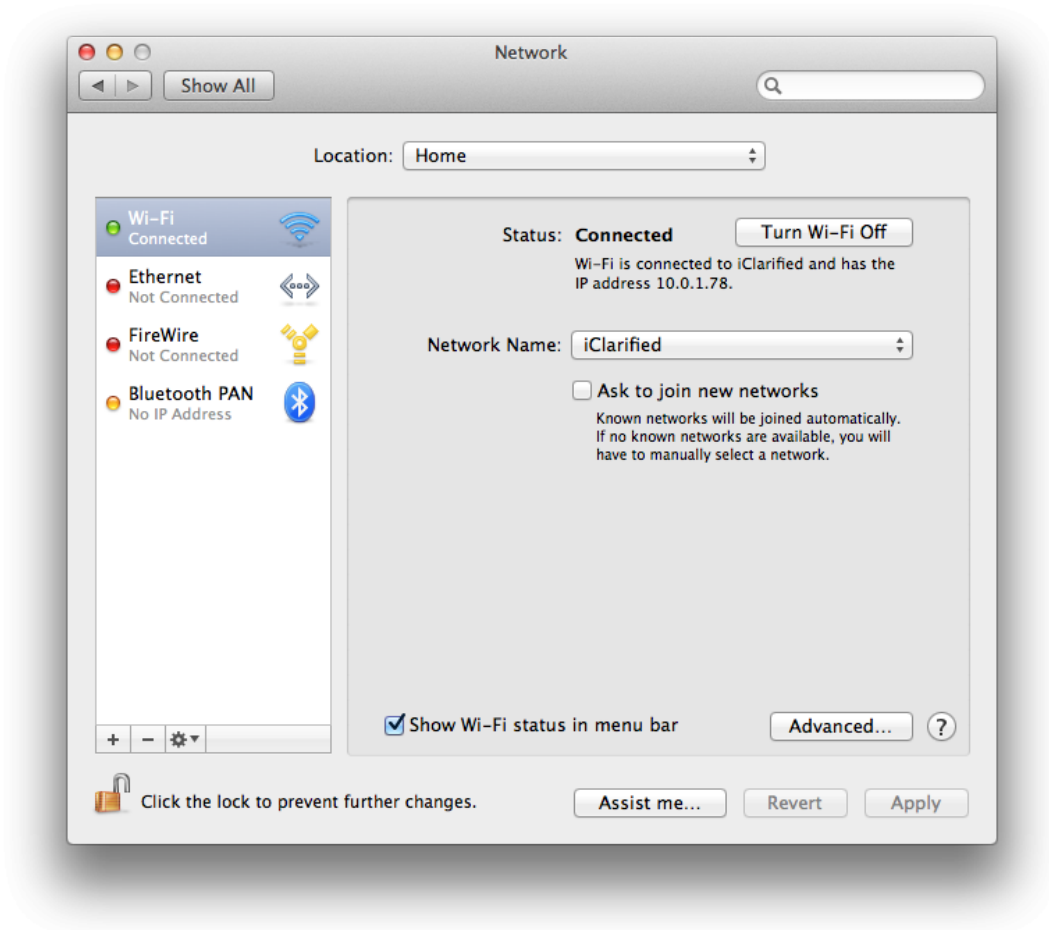

1. Select *System Preferences* from the Apple menu at the top left of your screen.

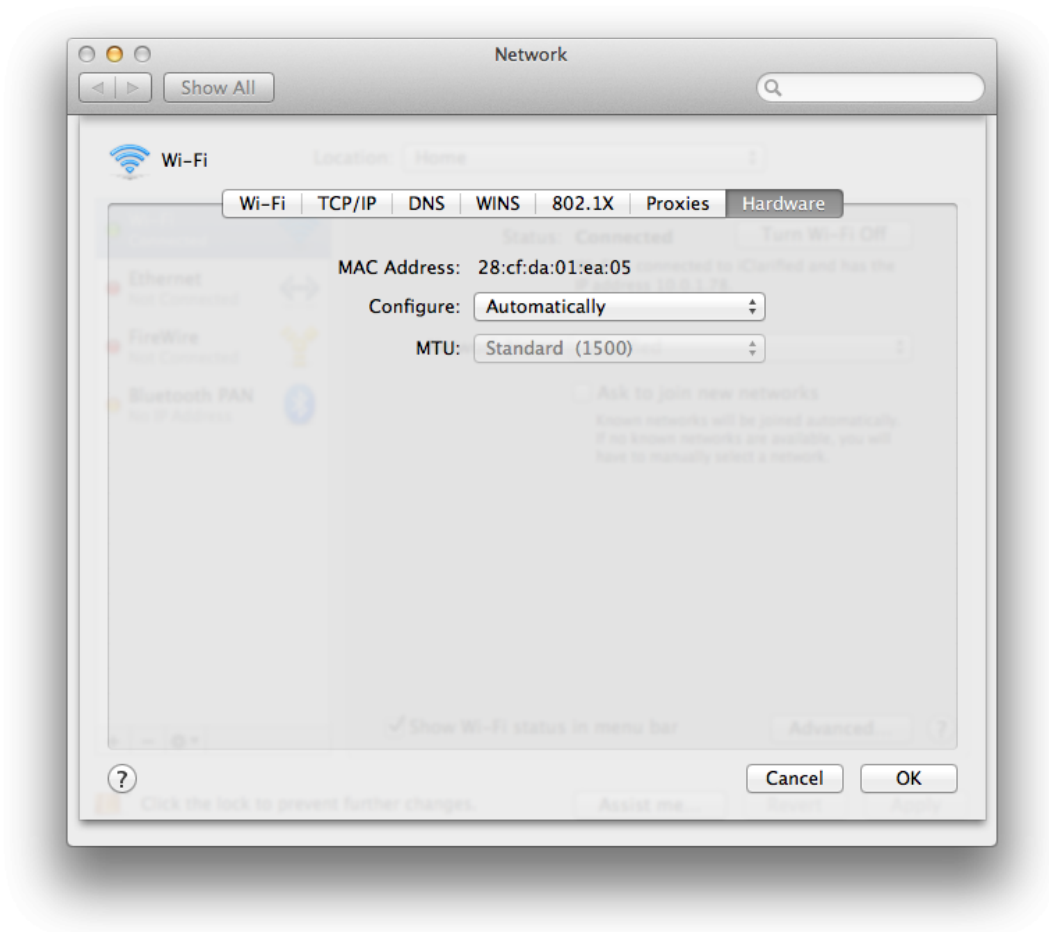

2. Click *Network* from the System Preferences menu.

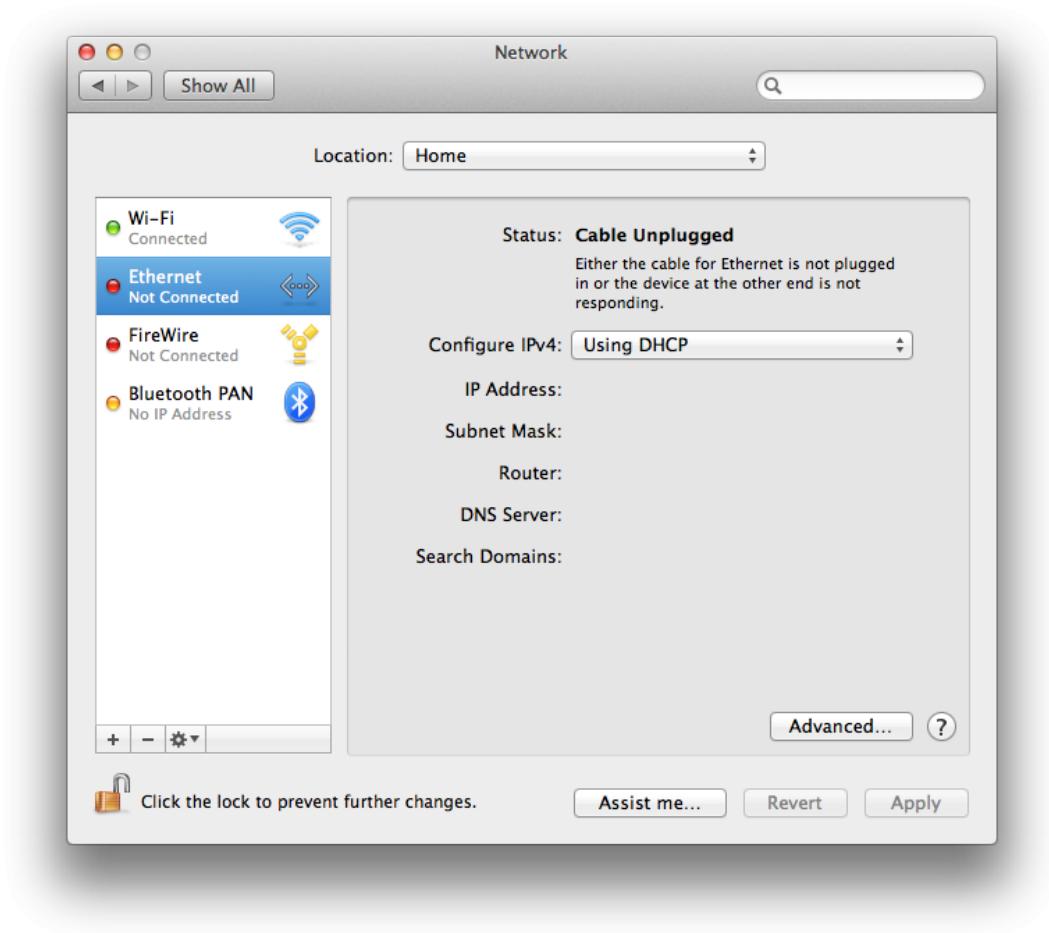

3. Choose *Wi-Fi* from the list of interfaces on the left and click the *Advanced* button.

4. Choose the *Hardware* tab under which you will see the MAC address of your wireless card.

5. Press *Cancel* to return to the Network menu. Choose *Ethernet* from the list of interfaces on the left and click the *Advanced* button.

6. Choose the *Hardware* tab under which you will see the MAC address of your ethernet card.
