Using wireless or from off-campus :

Our printers are behind a firewall

If you are using a wired ethernet connection in eoas, you should be able to print. (please disconnect from Cisco Anyconnect, the myvpn.ubc.ca vpn software)

Off campus or using UBC wireless, a connection through myvpn.ubc.ca is required and your Campus Wide Login name (cwlname) must be registered in our firewall.

If you are not registered in our firewall, please send a ticket or email requesting printer firewall enrolment with your Campus Wide Login name.

Then usage of myvpn.ubc.ca requires logging in with CWLname with appended .eos (CWLname.eos) and the usual CWL password

To check your network's connection, use a browser to visit the respective printer website:

http://142.103.250.5 or

http://137.82.139.20

Ricoh drivers setup:

Step#1.- Download and install driver: *Please note that the C8003 and C6503 have the same URL*

- For MP C3004 in Room 326D:
