## New development web site

2017-05-06 - Burner EOAS - 0 Comments - in Changes

A new development web site has been set up at [dev.eoas.ubc.ca](http://dev.eoas.ubc.ca). This site is intended to support ongoing development in a safe area that will not conflict with our production web sites. This site is not world-accessible, interested parties from off-campus must first use the University's [myvpn.ubc.ca](http://myvpn.ubc.ca) service (and eos context), to connect to the internal University network.

On-campus locations in the Department of Earth, Ocean and Atmospheric sciences should already have access.
